GROHE

## Installation instructions

## Installation Instructions

**Flush piping system prior and after installation of fitting thoroughly!**

**Installation and connection, see Figs [1] to [9].**

Refer to the dimensional drawing above. For installation with 32635000 concealed in-wall body. **PLEASE NOTE** face of noggins need to be positioned a minimum of 45mm & a maximum of 75mm from where the finished wall surface will end up when installing inwall concealed body 32635000.

### Installation

1. Screw on cap (A), see Fig. [3].
2. Determine dimension "Y" from the leading edge of built-in fitting housing to face of tiles, see Fig. [4].
3. Crosscut connection nipple (B) in such a way, that the installation dimension is "Y" + 24mm.
4. Using an 12mm allen key, screw connection nipple (B) into the built-in fitting housing until the installation dimension is 10mm. Tighten spout (C) from above using an 2,5mm allen key, see Fig. [5].
5. Grease seal (D1) and push on escutcheon (D), see Fig. [6].
6. Attach insulating insert (E) and secure with screw (F), see Fig. [7].
7. Attach lever (G), secure by tightening the loosely fitted set screw (H) using an 3mm allen key and insert plug (I).  
If the escutcheon will not slide far enough onto the cap, you must additionally install an extension (see replacement parts)

### Note:

When installing concealed mixer body, please note it must be mounted onto timber or solid walls using appropriate reinforcement to ensure sufficient strength.

**Open cold and hot water supply and check connections for leakage!**

### Care

For directions on the care of this fitting, please refer to the accompanying care instructions.

This product must be installed in conformance with local codes e.g. AS/NZS 3500 series of standard!
