INSTALLATION INSTRUCTIONS

IMPORTANT: Please read all of the instructions before installation.

IMPORTANT: Before you begin, turn off the water supply.

Step 1

- Wall lining hole should be cut or finished as per the dimension shown in the diagram below.
- Cut off the threaded nipple 15 ±2mm from the wall lining and apply thread seal tape to ensure a good seal.

Step 2

- Insert faceplate o-ring into the groove in the faceplate and slide the faceplate over the nipple.
- Secure faceplate in place by screwing the inlet connector onto the nipple.

Step 3

- Ensure outlet bracket o-ring is located on faceplate.
- Firmly push the outlet bracket onto the inlet connector and secure in place by tightening the grub screw firmly using the hex key provided.

Step 4

- Connect hose to outlet bracket and handset.
- Ensure swivelling cone is connected to the handset.

Care and Cleaning

We recommend the use of soapy water or approved cleaners. This product should not be cleaned with abrasive materials. Damage caused by improper treatment is not covered by the product warranty – refer to warranty conditions on the last page.

A filter washer should be installed in the hose cone on the water outlet and it should be cleaned periodically.

If shower performance is compromised by the build-up of lime-scale, clean by using a soft toothbrush and gently scrubbing along the spray slot under running water.

Plumbers, please ensure a copy of the installation instructions is left with the end user for future reference
