The manufacturer/distributor reserves the right to vary specifications or delete models from their range without prior notification. Dimensions are nominal measurements only. Dimensions and set-outs listed are correct at time of publication however the manufacturer/distributor takes no responsibility for printing errors.
STREAM WALL BASIN MIXER SET
MATTE BLACK

INSTALLATION INSTRUCTIONS

Note
Mixer must be installed to the requirements of AS/NZS 3500 by a qualified plumber.

Important
Your mixer comes to you already factory assembled and tested. We do not recommend the dismantling of any internal part of the mixer. The mixers are factory tested and sealed so as to give the best performance.

Installation Procedure
1. Please flush out new pipe work prior to connecting the new mixer
2. This mixer is suitable for high pressure where both hot and cold water supply is at 150kPa or above
3. During installation protect the exposed finish surface by using the plastic cover provided. Please pay attention to the minimum/maximum depth. Allow for finished wall thickness
4. In a typical installation, the mixer is mounted on the timber/metal noggin and secured with screws (not provided)
5. NOTE: Ensure mixer body is level.
6. Mixer must be installed with water outlet on the left. Connect the mixer to hot and cold water supply as per markings on mixer body
7. Pressure test all connections. Leaking joints are not covered by the warranty.
8. When the wall is finished, remove the plastic cover and fit dress plate, handle and outlet by securing grub screw.

Servicing - Replacement of Cartridge
1. Remove cap and unscrew grub screw using allen key
2. Lift off handle and remove cartridge dome, unscrew brass locking nut and lift out cartridge
3. Replace cartridge, replace brass locking nut and replace handle. Tighten grub screw and push in indicator cap.

Servicing - Flow Regulator (If Flow rate drops)
1. Remove spout by unscrewing grub screws, remove push-in connector.
2. Remove flow regulator (9) and flush with water or replace.
